SURBHI SHRIVASTAVA

surbhishrivastava66@gmail.com | +91-7022662724 | https://www.linkedin.com/in/surbhi-s-shri/

Profile

- **Software Developer**, having 4 years of working experience in Application Design and Development.
- Expertise in Java, Spring, JSP, HTML and JDBC technologies.
- Good at OOPs concepts, Data Structures & Algorithms.
- Having knowledge of Shell Scripting, Unix and SQL.
- Having working experience on tools like- Git, Maven, Jira, Confluence, Junit, TDD, Apache Tomcat 7.0, Oracle, MySql, Putty, STS/ Eclipse and Control-m.

Experience

Software Engineer | HSBC Software Development (India) Private Limited
Pune | Mar 2018 - Mar 2020

Worked on **Data Management Layer** for Satellite Sites (London, Hong Kong, Paris, New York) to deal with various types of trading and accounting data. It's a single point of integration to improve connectivity between multiple Global Banking and Markets Systems (GBMs). Our team is responsible for data Transformation, Enrichment, Filtering, Joining, Routing and Batch Processing.

Roles & Responsibilities

- Worked as backend developer for creating many **Real time and Batch (Intraday & EOD) Feeds** using Java, Spring (Batch & Integration framework), Maven, JDBC, Unix shell scripting and SQL technologies to integrate various systems globally within HSBC.
- Implemented various message/file transfer protocols such as SFTP, JMS, Connect Direct and MQ in our code to establish communication among several upstream and downstream systems.
- Created the automated **Certificate Generation Utility** for the team by using Java, Sql and Shell Scripting.
- Worked as full stack developer for automated the **Log Viewer Web Utility** for the production support team across the Global HSBC, by using Java, Spring, Spring boot, JSP, HTML and Bootstrap CSS.

Software Developer | Amdocs (India) Private Limited
Pune | Feb 2016 - Feb 2018

Worked on **Order Management System** for the AT&T client. It is used by AT&T Agents, Manager's and Stakeholders to track the details of the orders and customer plans.

Roles & Responsibilities

- Developed **One View Tracker Tool** using Java SE, Spring, JSP and SQL for AT&T client. This is a web-based tool which is used by AT&T Agents and Managers to track their customer's plans and agents details in the OMS (Order management system) and CRM (customer relation management) Databases.
- Developed **PST Order Search Tool** using ColdFusion, HTML, CSS and SQL technologies for AT&T client. The AT&T agents and stakeholders are using this tool for logging the task to create orders, cases and exceptions related to these orders.

EDUCATION

Rajiv Gandhi Proudyogiki Vishwavidyalaya- Bhopal, Madhya Pradesh (India) | Bachelor of Engineering (B.E) Information Technology (IT) | 2015
